Everything at a glance!

The **FSG M 4.0** airless paint sprayer is particularly suitable for smooth surfaces. A smooth spray product is achieved even on hard-to-reach areas, such as beams or corners.

Depending on the paint thickness to be applied, spraying pressure and distance of the surface to be processed, the spraying speed and also the spraying pressure can be optimally adjusted.

Basic equipment

- Spray gun
- High pressure hose
- Spray gun
- Extension lance 50 cm
- Nozzle set
- Filter
- Membrane
- Tool bag with key
